AGRICULTURE & INNOVATION

**Ughetta Bertini- OG  
Fertibio**

**13-14 April 2021**  
EIP-AGRI Seminar 'Healthy soils for Europe:  
sustainable management through knowledge and practice'

# Biofertilizers scenario

The main issue on biofertilizers application in Tuscany:

- **Not much research** on field crop biofertilizer application in the Tuscany environment;
- **Lack of knowledge** in farmers about biofertilizers application;
- **Laboratory scale production** of biofertilizers used in the experiment.

# Fertibio proposal

1. Test the application of biofertilizers in different field crops.
2. Train farmers about biofertilizers application.
3. Transferring biofertilizers production process from laboratory to prototype scale.

# Test the application of biofertilizers on different field crops

# Train farmers about biofertilizers application

2 x

**Course title:** «Innovative biological fertilizers»  
**Participants:** 15 participants, farmers and agricultura entrepreneur  
**Duration:** 20 h + field trip

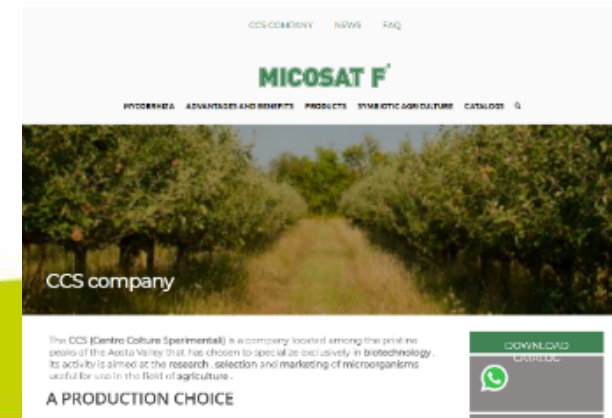

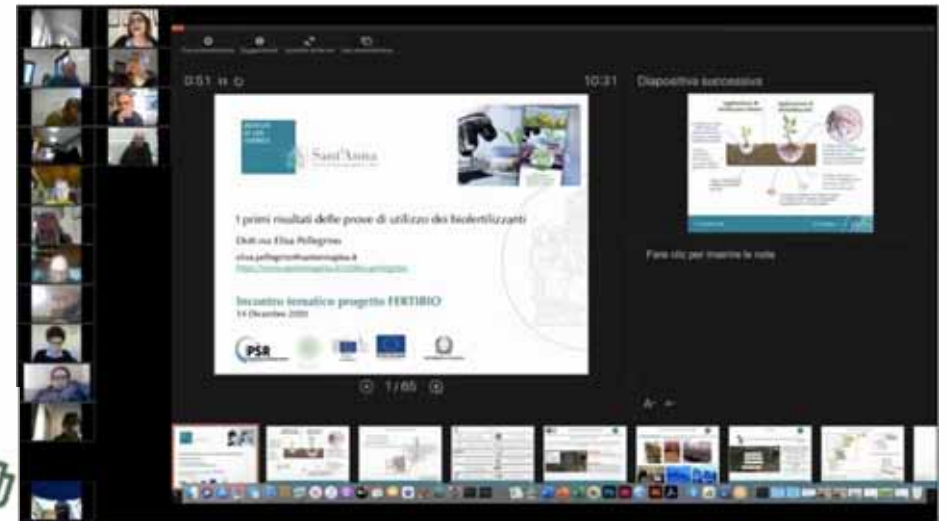

2 x

**Workshop title:** «Sustainable fertilization using biofertilizer. Case of study»  
**Participants:** 15 participants, farmers and agriculture entrepreneurs  
**Duration:** 5 h

2 x

**Field trip**  
**Participants :** 15 participants, farmers and agriculture entrepreneurs  
**Duration:** 3 days  
**Location:** CCS Company

# Transferring biofertilizers production process from laboratory to prototype scale
